

Diagnostic Wax-up Check List

The following are essential tools that we will need to design your aesthetic case, and should be obtained during the initial diagnostic appointment and prior to prepping.

1. All 5 requested photos listed on our **Diagnostic Wax-Up Photo Guide**
2. Full arch impressions of both upper and lower arches (must include good gingival capture)
3. Bite registration, including CR/CO bites
4. Stick-bite (horizontal plant, parallel to horizon line between pupils)
5. Detailed lab prescription to include:
 - a. A clear expression of the patients goals
 - b. The measurement of desired final length of the centrals
 - c. New vertical measurements from CEJ to CEJ
